

Shorting Cap Backshell

Shorting Applications — These caps are used to cover up exposed wires on the back of a shorting connector. Shorting connectors are used to protect critical circuits from static discharge.

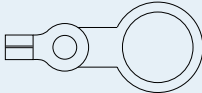

Plugs can also re-route circuits in **Switching** applications. Or, resistors and active electronics can be installed. Whatever the application, a shorting cap is a simple way to cover up the back end of the connector.

MATERIALS

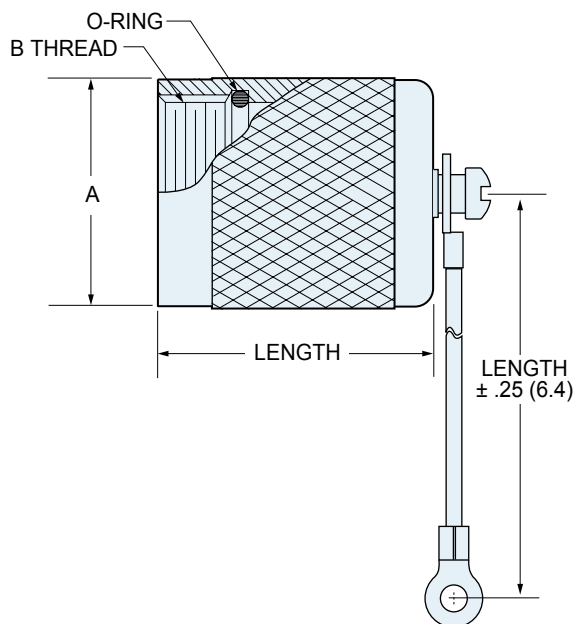

Cap	Aluminum Alloy 6061-T6 or 300 Series Stainless Steel
O-Ring	Silicone Rubber
Hardware	300 Series Stainless Steel
